EDUCATION

Haldia Institute of Technology, Haldia, West Bengal, India
B.Tech In Computer Science & Engineering (AI & ML)

Expected - 2027
CGPA - 7.9 (till 5th semester)

Khanchi Gunadhar Adarsha Vidyapith, West Bengal, India
12th WBCHSE Board

Year of Passing - 2022
Score - 90%

Khanchi Gunadhar Adarsha Vidyapith, West Bengal, India
10th WBBSE Board

Year of Passing - 2020
Score - 86%

PROJECTS

TREASURE – GAME DISCOVERY & DEAL AGGREGATION PLATFORM

- *Kotlin, Spring Boot, Android (Jetpack Compose), Redis, RabbitMQ, AWS*
- Architected and deployed a cloud-hosted platform that aggregates game metadata and pricing information from multiple third-party providers into a unified experience for mobile users.
- Designed asynchronous data-processing workflows using RabbitMQ, Spring Scheduling, and background workers to decouple external API synchronization from user-facing requests.
- Implemented Redis caching, distributed rate limiting, JWT-based authentication, and refresh-token management to improve performance, security, and resilience.
- Built REST APIs backed by PostgreSQL and Flyway-managed schema migrations, supporting wishlist management, game search, and personalized user features.
- Developed an Android application using Jetpack Compose, Retrofit, and WorkManager, enabling secure authentication, real-time deal discovery, and background wishlist synchronization.
- Containerized services with Docker and deployed them on AWS, integrating Redis, RabbitMQ, and PostgreSQL into a production-style environment.

ACHIEVEMENTS & OPEN SOURCE

- *Windows 11 PowerToys Command Palette Extension*
- Independently built and publicly released an extension integrating the PowerToys Command Palette with native Windows APIs for HDR toggling and AC/DC-aware power-mode control.

SKILLS

- Programming Languages: C++, Kotlin, Java
- Mobile Development: Android SDK, Jetpack Compose, MVVM/Clean Architecture, Hilt, Retrofit, Room
- Backend Development: Spring Boot, Spring AI, JWT, OAuth2
- Databases & Messaging: PostgreSQL, MongoDB, Redis, RabbitMQ
- DevOps: Docker, AWS (Elastic Beanstalk), Git & GitHub
- Core CS: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Operating Systems (OS), Database Management Systems (DBMS), System Design
